

FUNGICIDE CLASSIFICATION

Repeated use of fungicides with the same mode of action can result in the selection of fungicide-resistant strains of plant pathogens.

by MODE OF ACTION (MOA)

This section groups fungicides by their mode of action to assist in the selection of fungicides **1)** to maintain greater diversity in fungicide use and **2)** to rotate among effective fungicides with different modes of action to delay the development of fungicide resistance.

Fungicides are classified according to their mode of action, or numeric FRAC code. The list of FRAC codes was developed by the Fungicide Resistance Action Committee and is a technical classification of fungicide modes of action according to scientific data.
